**MEMO**

Dear James

As per my correspondence yesterday, below please find some testimonial from selected Mitsubishi Electric Bulldogs players pertaining to their consumption of BodyScience products.

Please can I view any press release that makes reference to the Bulldogs team prior to final distribution.

**Body Science Testimonial**

**Mark O'Meley** – Mitsubishi Electric Bulldogs Forward, uses the Mass Monster, Omega 3, Creatine – Myocitin CVF.

"It's important for today's athletes to continually strive for the complete performance. In order to do this I was in search of supplements that could provide energy along with assisting with recovery."

"Since commencing on the BodyScience products I feel the every day strain on my body has been reduced. I've been able to keep my muscle mass throughout the season and so my performances have been a lot more consistent."

**Jamie Feeney** – Mitsubishi Electric Bulldogs Utility Forward, uses Mass Monster, Creatine – Myocitin CVF.

"Every day I use the Mass Monster at breakfast. I felt it was important to put on some size so that I could have more impact in my game. Now that I've religiously used the Mass Monster over a 10 month period, I've developed weight gain and with it extra strength. I also take the creatine products to help with muscle mass and recovery and feel as though the continual ask of my body has been less taxing."

**Tony Grimaldi** – Mitsubishi Electric Bulldogs Utility Forward, uses Mass Monster, Creatine Myocitin CVF.

"After each training session I drink the BodyScience products so as to reduce fatigue and to maintain my weight throughout the season. I have had difficulty in the past with losing too much weight after games but this season I've played at the same weight and felt stronger for it. I want to be feeding the temple high performance fuel."

**Johnathan Thurston** – Mitsubishi Electric Bulldogs Five-Eighth, uses Mass Monster.

"Initially I was encouraged by the Mitsubishi Electric Bulldogs Training staff to take the Mass Monster product to add muscle mass to my thin frame. I now use it regularly because I can feel the benefits of being stronger. In order to compete consistently throughout the season against physically stronger opposition, I have to absorb a lot and I can now offer more."
